Aluminium naturel  
Aluminium natur

E' un tubo di grande praticità e facilità d'installazione, elimina i gomiti e si adatta alle varie lunghezze che l'installazione richiede: un pezzo di 85 cm si può allungare fino a 3 metri!

## CAMPO DI APPLICAZIONE CONDOTTE D'ARIA - ASPIRAZIONI - CAPPE

TEMPERATURA MASSIMA di esercizio: 300°C per il tubo in alluminio naturale, 200°C per il tubo in alluminio colorato (in questo caso è la vernice che si deteriora).

Il tubo flessibile in alluminio non si può usare su stufe a legna e carbone perchè i loro fumi normalmente raggiungono temperature superiori ai 300°C.

This pipe is extremely practical to use and easy to install. It eliminates the need for elbows and adapts to a variety of lengths to suit specific installation requirements: an 85 cm piece can extend up to 3 metres!

## FIELD OF APPLICATION AIR DUCTS – SUCTION SYSTEMS - HOODS

MAXIMUM OPERATING TEMPERATURE: 300°C for the natural aluminium pipe, 200°C for the painted aluminium pipe (in this case it is the paint that deteriorates). The flexible aluminium pipe cannot be used on wood-burning and coal stoves as the temperature of the smoke produced normally exceeds 300°C.
